Idaho Digital Learning Alliance's (IDLA) credit recovery program is a hybrid approach of a traditional IDLA custom session and a district-led intervention program. In partnership with the District, these ten week courses combine required synchronous live sessions with asynchronous instruction to provide students with a high level of learning. IDLA will provide the course content, Learning Management System, teachers, and internal support staff. Districts will provide local personnel to support the students with intervention support, social-emotional support, physical and/or virtual technical access to courses, and transcription of credits. Districts will need to sign an MOA and have their supporting personnel complete a short training prior to registering students.

The IDLA Credit Recovery classes are designed for students needing to recover credits to stay on track for graduation. If a student is a first time learner, IDLA has other options available for their specific needs.
